FINAL EXAMINATION

TRIMESTER 2, 2016/2017

BFN1014 – FINANCIAL MANAGEMENT 1

(All sections / Groups)

27 FEBRUARY 2017
9.00a.m – 11.00a.m
(2 Hours)

INSTRUCTIONS TO STUDENTS

1. This question paper consists of **NINE (9)** printed pages inclusive cover page, selected formula sheet and financial tables.

2. **SECTION A: 10 Multiples Choice Questions**. Please shed your answer in the OMR sheet provided.

   SECTION B: 4 Structured Questions. Answer **ALL FOUR** questions in the answer booklet provided.

3. The distribution mark is shown at the end of each question.

SECTION A: MULTIPLE CHOICES QUESTIONS (20%)

1) Which of the following is a difference between common stock and bonds?

A) Bondholders have a voice in management; common stockholders do not.
B) Bondholders have a senior claim on assets and income relative to stockholders.
C) Stocks have a stated maturity but bonds do not.
D) Dividend paid to stockholders is tax-deductible but interest paid to bondholders are not.

2) Risk aversion is the behavior exhibited by managers who require _____.

A) an increase in return, for a given decrease in risk
B) an increase in return, for a given increase in risk
C) no changes in return, for a given increase in risk
D) decrease in return, for a given increase in risk

3) _____ is the extent of an asset's risk. It is found by subtracting the pessimistic outcome from the optimistic outcome.

A) Variance
B) Standard deviation
C) Probability distribution
D) Range

4) The _____ is the rate of return that a firm must earn on its investments in order to maintain the market value of its stock.

A) yield to maturity
B) cost of capital
C) internal rate of return
D) modified internal rate of return

5) The _____ is the firm's desired optimal mix of debt and equity financing.

A) book value
B) market value
C) cost of capital
D) target capital structure

Continued...

6) _____ projects do not compete with each other; the acceptance of one _____ the others from consideration.

A) Capital; eliminates
B) Independent; does not eliminate
C) Mutually exclusive; eliminates
D) Replacement; eliminates

7) When evaluating a capital budgeting project, installation costs of a new machine must be considered as part of _____.

A) the operating cash inflows
B) the initial investment
C) the incremental operating cash inflows
D) the operating cash outflows

8) _____ results from the use of fixed-cost assets or funds to magnify returns to a firm's owners.

A) Long-term debt
B) Equity
C) Leverage
D) Capital structure

9) The purpose of managing current assets and current liabilities is to _____.

A) achieve a balance between short-term and long-term financing of a firm
B) achieve as low a level of current liabilities as possible
C) achieve a balance between profitability and risk that contributes to a firm's value
D) achieve as high a level of current liabilities as possible

10) As sales increase, a company needs more inventory and more employees resulting in _____.

A) more accounts payable and accruals, and therefore increasing its spontaneous liabilities
B) less accounts payable and accruals, and therefore decreasing its spontaneous liabilities
C) more accounts payable and accruals, and therefore decreasing its spontaneous liabilities
D) less accounts payable and accruals, and therefore increasing its spontaneous liabilities

Continued...

SECTION B: STRUCTURED QUESTIONS (80%)

Question 1 (20 marks)

(a) Julie's Biscuit Company paid RM2.00 per share in common stock dividends last year. The company's policy is to allow its dividend to grow at 5 percent for 4 years and then the rate of growth changes to 3 percent per year from year five and thereafter. What is the value of the stock if the required rate of return is 8 percent?

(10 marks)

(b) Dr. Dan is considering investment in a project with beta coefficient of 1.75. What would you recommend him to do if this investment has an 11.5 percent rate of return, risk-free rate is 5.5 percent, and the rate of return on the market portfolio of assets is 8.5 percent?

(5 marks)

(c) Perry purchased 100 shares of Ironman Incorporation's common stock for RM25 per share one year ago. During the year, Ironman Incorporation paid cash dividends of RM2 per share. The stock is currently selling for RM30 per share. If Adam sells all of his shares of Ironman Incorporation today, what rate of return would he realize?

(5 marks)

Question 2 (20 marks)

A firm has determined its optimal capital structure, which is composed of the following sources and target market value proportions:

Source of Capital	Target Market Proportions
Long-term debt	30%
Preferred stock	5%
Common stock equity	65%

Debt: The firm can sell a 20-year, RM1,000 par value, 9 percent bond for RM980. A flotation cost of 2 percent of the face value would be required in addition to the discount of RM20.

Preferred Stock: The firm has determined it can issue preferred stock at RM65 per share par value. The stock will pay an RM8.00 annual dividend. The cost of issuing and selling the stock is RM3 per share.

Continued...

Common Stock: The firm's common stock is currently selling for RM40 per share. The dividend expected to be paid at the end of the coming year is RM5.07. Its dividend payments have been growing at a constant rate for the last five years. Five years ago, the dividend was RM3.45. It is expected that to sell, a new common stock issue must be underpriced at RM1 per share and the firm must pay RM1 per share in flotation costs. Additionally, the firm's marginal tax rate is 40 percent.

Calculate the firm's weighted average cost of capital assuming the firm has exhausted all retained earnings.

Question 3 (20 marks)

(a)

Year	Operating Cash Flow
0	-RM 100,000
1	RM 25,000
2	RM 10,000
3	RM 50,000
4	RM 10,000
5	RM 10,000
6	RM 60,000

Given the information in the above table, with 15 percent cost of capital,

(i) compute the net present value.

(ii) should the project be accepted?

(10 marks)

(b) Bamboo manufacturing sells its finished product for an average of RM35 per unit with a variable cost per unit of RM21. The company has fixed operating costs of RM1,050,000.

(i) Calculate the firm's operating breakeven point in units.

(5 marks)

(ii) Using 100,000 units as a base, what is the firm's degree of operating leverage?

(5 marks)

Continued...

Question 4 (20 marks)

(a) Upin & Ipin Berhad is analyzing the performance of its cash management. On average, the firm holds inventory for 65 days, pays its suppliers in 35 days, and collects its receivables in 15 days. The firm has a current annual outlay of RM1,960,000 on operating cycle investments. Upin & Ipin Berhad currently pays 10 percent for its financing. (Assume a 360-day year.)

(i) Calculate the firm's cash conversion cycle.

(4 marks)

(ii) Calculate the firm's operating cycle.

(4 marks)

(iii) Calculate the daily expenditure and the firm's annual savings if the operating cycle is reduced by 15 days.

(7 marks)

(b) Global Logistics purchased a new machine on October 20th, 2016 for RM1,000,000 on credit. The supplier has offered credit terms of 2/10, net 45. The current interest rate the bank is offering is 16 percent. Assume 360 days in a year.

(i) Compute the cost of giving up cash discount.

(3 marks)

(ii) Should the firm take or give up the cash discount?

(2 marks)
